Cash App mainly supports Bitcoin (1)(8083017450) for deposits and withdrawals (1)(8083017450) .

So first you need to (1)(8083017450) make sure that your funds (1)(8083017450) in Trust Wallet are in (1)(8083017450) Bitcoin or convert them into (1)(8083017450) Bitcoin before transferring (1)(8083017450) .

## **Step 2: Convert (1)(8083017450) Crypto to Bitcoin (1)(8083017450)**

If you have other cryptocurrencies (1)(8083017450) like Ethereum or BNB, you (1)(8083017450) need to swap them into (1)(8083017450) Bitcoin using a crypto exchange (1)(8083017450) or swap feature (1)(8083017450) .

This step is necessary because (1)(8083017450) Cash App does not support (1)(8083017450) most other cryptocurrencies for deposits (1)(8083017450) .

### **Step 3: Get Cash (1)(8083017450) App Bitcoin Address (1)(8083017450)**

Open Cash App and go (1)(8083017450) to the Bitcoin section (1)(8083017450) .

Tap on receive Bitcoin and (1)(8083017450) copy your unique wallet address (1)(8083017450) which will be used to (1)(8083017450) receive funds from Trust Wallet (1)(8083017450) .

### **Step 4: Send (1)(8083017450) Bitcoin from Trust Wallet (1)(8083017450)**

Open Trust Wallet and select (1)(8083017450) Bitcoin from your assets (1)(8083017450) .

Tap on send option and (1)(8083017450) paste the Cash App Bitcoin (1)(8083017450) address carefully (1)(8083017450) .

Enter the amount you want (1)(8083017450) to transfer and confirm the (1)(8083017450) transaction (1)(8083017450) .

### **Step 5: Wait for (1)(8083017450) Confirmation (1)(8083017450)**

After sending Bitcoin, the transaction (1)(8083017450) will be processed on the (1)(8083017450) blockchain network (1)(8083017450) .

It may take some time depending (1)(8083017450) on network congestion and fees (1)(8083017450) . Once confirmed, the funds will (1)(8083017450) appear in your Cash App (1)(8083017450) balance (1)(8083017450) .

### **Important Tips (1)(8083017450)**
